POLICY DOCUMENT ON WATER CONSERVATION

Preamble:

It is simply impossible to imagine life without water, if there are no ample sources of water left then it would be a matter of great concern. The rapid pace of irrigation growth, urbanization & industrialization has put enormous stress on water resources. Water conservation encompasses the policies, strategies and activities to manage fresh water as a sustainable resource. We have taken several initiatives to conserve water such as rainwater harvesting from surface run-offs by the creation of pond. Bore well recharge by rooftop water collected and transferred near bore well. Maintenance of water distribution system, applying drip irrigation system to plants etc. Therefore, college make a policy for sustainable water conservation and strictly apply it.

Vision:

To implement proper water conservation methods that increase groundwater recharge, optimal sustainable development, maintenance of quality and efficient use of water resources to counterpart with the growing demands of college.

Objectives:

- To minimize the effects of water shortages and salinity.
- Supply and securing of clean and sufficient drinking water for the Institution.
- To reduce the wastage of water

Facilities:

- Roof water is collected by PVC pipes and harvested near the bore well that recharge it.
- Large Pond made in front of women's hostel in which surface running water of rain harvested.
- Water distribution system in the Campus.
- Drip irrigation system implemented to plants.

Procedure:

- Grant approval from the governing body for the implementation of the policy
- Maintenance of Water distribution system in the campus through the Nature Club Committee.
